ABOUT THE INSTITUTE

The National Institute of Health and Family Welfare is a premier autonomous Institute, funded by the Ministry of Health and Family Welfare, Government of India. It has kept pace with the new thinking and substantially contributed to the health manpower development in the country.

NIHFW serves as an apex 'technical institute' as well as a 'think tank' to promote national health and family welfare programmes in the country through education and training, research and evaluation, consultancy and advisory services, specialized projects, etc.

LOCATION OF THE INSTITUTE

It is situated in South Delhi, near Jawaharlal Nehru University and Munirka DDA Flats. It is easily accessible from the Indira Gandhi International Airport and the New Delhi Railway Station, approximately 10 kms. and 15 kms. respectively. Pre-paid taxis/auto-rickshaws are available.

COURSE FEE

There is a course fee of Rs. 5000/- per participant which can be paid by DD or online banking. The bank details are:

Name of the Beneficiary : Director, NIHFW, New Delhi
Bank Name & Branch : SBI, NIHFW, Munirka, New Delhi
Account No. : 43901234540
IFSC Code No. : SBIN0001624
Branch Code No. : 1624
MICR Code no. : 110002056

ACCOMODATION

Boarding and lodging facilities for the participants are available in the Hostel of the Institute on the payment of as per the approved tariff.

31st TRAINING COURSE ON LOGISTICS AND SUPPLY MANAGEMENT SYSTEM IN HEALTH AND FAMILY WELFARE

22nd - 26th FEBRUARY, 2027

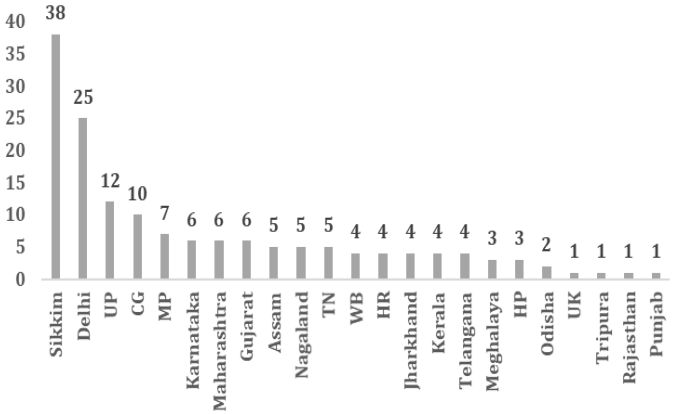
The National Institute of Health & Family Welfare
New Delhi-110 067
Website: www.nihfw.ac.in

INTRODUCTION

The original meaning of the word 'Logistics' had a distinct military connotation, defined by Webster as *"the branch of military science concerned with the procurement, transportation, maintenance, and supply of troops, equipment, and facilities used for bellicose purposes."* Similarly, a Health and Family Welfare Programme has its logistic system, which provides essential medicines and contraceptive supplies even to remote peripheral service points on a regular basis. If this logistics supply malfunctions, the whole programme suffers; if it is interrupted, the whole programme collapses. Thus, the Health and Family Welfare Programme managers have been quick to identify logistics as a crucial component of the Health Care Delivery System.

As the demand for Health and Family Welfare services has expanded and become more sophisticated in terms of their quality, its logistics system has to respond accordingly. Initially viewed as simply medicines and contraceptives distribution and resupply networks, the logistics systems must now procure, stock, and resupply medical equipment, materials, and supplies. It is against this background that this training course has been formulated so that the personnel dealing with this aspect of the Health Care Delivery System at various levels could understand its problematic areas and probable solutions by observing the principles of materials management and procedures evolved in other organizations.

No. of Participants trained (Yr. 2018 - 2024)



GENERAL OBJECTIVE

This course is aimed at enhancing the competence of participants in the areas of logistics, supplies, and materials management to improve the internal mechanism for effective distribution of medicines, Contraceptives equipment and related supplies to the various levels of the health care delivery system.

SPECIFIC OBJECTIVE

At the end of the course, the participants will be able to:

- Describe the basic principles of logistics and supply management in relation to the Health Care Delivery System.
- Discuss the National Drug Policy and Drugs and Cosmetic Act in India.
- Enumerate the various steps of the Materials Management Cycle.
- Discuss the different components of Materials and Equipment management in detail in relation to the Health Care Delivery System.
- Demonstrate the scientific techniques required to improve the logistics system

OUR RESOURCE FACULTIES

Dr. B. K Patro

Dr. Rajesh Ranjan

Dr. J K Das

Dr. Pawan Kapoor

Dr. Santosh Talwar

Dr. Sanjay Arya

COURSE CONTENT

The course intends to cover topics such as:

- Principles of Logistics and Supply Management
- Materials Management Cycle
- Inventory Control Techniques
- Demand Estimation & Forecasting Techniques
- Procurement Procedures for Materials and Equipment
- Receipt and Inspection of procured items
- Medical Store Management
- Condemnation and Disposal procedures
- National Drug Policy & Drugs and Cosmetic Act
- NHM/ RCH

METHODOLOGY

The methodology of the course will comprise:

- Lecture-Discussions/Sessions
- Management Exercises

Each Lecture-Discussion Session will cover content with discussion and interaction. Management exercises and group work will be used for practical training. Participants will be divided into groups and given a topic for discussion and preparation of an action plan.

DURATION

05 days, four sessions will be conducted daily

NATURE OF PARTICIPANTS

Medical Officers and Officers responsible for Stores, Logistics & Supplies, Procurement through GeM and Medical Stores Depots (MSD) at the Central, State, and District levels.

VENUE

Teaching block, NIHFW, New Delhi
