

## Important Pathology Topics with Robbins Page Numbers

---

| S. No. | Topic                                                     | Page No. (Robbins) |
|--------|-----------------------------------------------------------|--------------------|
| 1      | Pathogenesis of Atherosclerosis                           | Pg. 499            |
| 2      | Morphological changes in MI (Table)                       | Pg. 547            |
| 3      | Modified Duke Criteria (Table)                            | Pg. 564            |
| 4      | Ann Arbor Classification (Table)                          | Pg. 615            |
| 5      | Pathogenesis of CML                                       | Pg. 623            |
| 6      | Classification of Anemia (Table)                          | Pg. 636            |
| 7      | Pathophysiology of Sickle Cell Disease                    | Pg. 642            |
| 8      | Pathogenesis of $\beta$ -Thalassemia                      | Pg. 645            |
| 9      | Mechanism of Vitamin B12 Absorption                       | Pg. 652            |
| 10     | Pathophysiology of DIC                                    | Pg. 670            |
| 11     | Pathogenesis of Asthma                                    | Pg. 685            |
| 12     | Mechanisms of Gastric Injury and Protection               | Pg. 765            |
| 13     | Difference between Crohn's Disease and Ulcerative Colitis | Pg. 792            |
| 14     | Adenoma-Carcinoma Sequence                                | Pg. 815            |
| 15     | Colon Carcinogenesis                                      | Pg. 815            |
| 16     | Serological Markers in Hepatitis B Infection              | Pg. 833            |
| 17     | Alcoholic Liver Disease                                   | Pg. 844            |
| 18     | Bilirubin Metabolism                                      | Pg. 852            |
| 19     | Pathogenesis of Acute Pancreatitis                        | Pg. 883            |
| 20     | Classification of Testicular Tumor                        | Pg. 969            |
| 21     | Pathogenesis of BPH (Benign Prostatic Hyperplasia)        | Pg. 976            |
| 22     | WHO Classification of Ovarian Neoplasm                    | Pg. 1017           |
| 23     | Pathway of Breast Cancer                                  | Pg. 1050           |
| 24     | Molecular Subtypes of Breast Cancer                       | Pg. 1050           |
