2026

About the Programme

Agnikarma (thermal cautery) & Raktamokshana (therapeutic bloodletting) are considered as effective treatment regimes for the diseases which are not manageable only through medicines. Agnikarma & Raktamokshana have proved to be effective in various conditions of pain, bleeding, infections etc. Acharya Sushruta has mentioned Agnikarma & Raktamokshana as Anushastra (para surgical procedures) which are quick & result oriented treatments for complicated diseases.

Common indications of Agnikarma include Vedna (pain), Stambha (Stiffness) and Shotha (inflammation) conditions. Diseases treated with Agni karma does not recur. Similarly Raktamokshana treatment modality that contributes majorly to wards the entire treatment of skin diseases and other raktaja & pittaja vyadhis. However, both the techniques requires skill to practice clinically.

Outcome

1. SOPs for gaining the expertise of these techniques.
2. Empirical use of Anushastra (Agnikarma & Raktamokshana).
3. Application of these therapies as per classical texts as well non conventional use of Anushastra.
4. Implications of invasive procedures of Ayurveda.
5. Accommodation for participants will not be provided .
